

Sustainable Workplace Teambuilding

FIRST, DO. THEN, INSPIRE.

#1 CLEAN UP EXPERIENCE

Last March 2023, TYDE organized for an International Toy Manufacturing Company a "Sustainable Workplace" team building experience, where 14 members collected 52kg of trash from 7.30 am to 8.30 am, in VSIP3 industrial zone, in Binh Duong city.

While they were doing the clean-up, TYDE asked participants to discuss in pairs some questions to understand how TRASH THROWERS see, think, feel, say, and do. By doing this, the team could gain more insights about the environment.

#2 REFLECTION

As part of the company, people know that they are playing their part in building a sustainable future and creating a better world for their children to inherit. It's crucial to be aware of the current challenges by taking the initiative, experiencing them, and inspiring others to do it. For a better future, for the next generation, and for the builders of tomorrow.

#3 PLAN FOR THE FUTURE

The first step is to RETHINK your habits. Then, if there is no solution, Refuse trash. Then, find local solutions to Reuse it. And finally, if you still have trash, Recycle.

It starts with each individual, as part of the company, but also as a friend, a member of your family, with your parents, and most importantly, with your role models: your children.
